

Henry Zhou

Software Developer | C#/.NET Developer

Edmonton, Alberta, Canada

(780) 868-3860

zyhhenry42@gmail.com

PROFESSIONAL SUMMARY

Software Developer with 2+ years of professional experience designing and supporting enterprise applications, RESTful APIs, and database-driven business systems using C#, ASP.NET Core, SQL Server, Entity Framework Core, and modern .NET technologies. Experienced throughout the software development lifecycle, including requirements analysis, development, testing, deployment, troubleshooting, and production support. Strong background in workflow automation, business process optimization, system integrations, and delivering scalable solutions that improve operational efficiency.

EXPERIENCE

Solid Technology Solutions, Edmonton, AB — *Software Developer*

June 2024 – May 2026

- Designed and developed enterprise web applications using ASP.NET Core, C#, Razor Pages, SQL Server, and Entity Framework Core.
- Designed reusable and maintainable software components using object-oriented design principles, dependency injection, and modular architecture patterns.
- Designed, developed, and maintained RESTful APIs supporting business-critical workflows, system integrations, and operational reporting requirements.
- Developed a healthcare communication and workflow management platform that streamlined interactions between healthcare providers through automated notifications, call routing, and case tracking.
- Implemented backend services for asynchronous processing, transcription workflows, ticket management, call tracking, notification delivery, and data synchronization.
- Designed and optimized database structures, queries, and business logic across Microsoft SQL Server and PostgreSQL environments to support operational workflows and reporting requirements.
- Identified and implemented process improvements through workflow automation, system integration, and application enhancements that reduced manual effort and improved operational efficiency.

SKILLS

Languages:

- C#
- SQL
- JavaScript
- HTML/CSS

Frameworks & Technologies:

- ASP.NET Core
- .NET 8+
- Entity Framework Core
- Razor Pages
- REST APIs

Software Engineering:

- Object-Oriented Programming (OOP)
- SOLID Principles
- Design Patterns
- Dependency Injection
- Software Architecture
- Software Development Life Cycle (SDLC)
- Agile Development
- Unit Testing
- API Design
- Troubleshooting & Debugging

- Integrated ERP, AI, telephony, and workflow automation platforms to reduce manual effort and improve operational efficiency.
- Collaborated with stakeholders to gather requirements, translate business needs into technical solutions, and participate in system design discussions.
- Supported full software development lifecycle activities, including requirements analysis, development, testing, deployment, troubleshooting, bug fixes, and production support.
- Improved maintainability and scalability through modular architecture, dependency injection, reusable service layers, and adherence to software engineering best practices.

SELECTED PROFESSIONAL PROJECTS

Healthcare Communication & Workflow Automation Platform

- Developed a healthcare communication platform using ASP.NET Core, SQL Server, Twilio Voice/SMS, and AI-powered workflow automation.
- Implemented backend services for call management, transcription workflows, notifications, ticket tracking, and data synchronization.
- Designed REST APIs, database solutions, and workflow automation processes supporting complex operational requirements and high-volume business workflows.

Inventory & ERP Workflow Automation Solution

- Developed enterprise business applications and RESTful APIs for inventory management, sales order processing, and ERP integration.
- Implemented data synchronization and workflow automation processes across multiple business systems.
- Optimized database operations and business logic using SQL Server and modern .NET technologies.

EDUCATION

Northern Alberta Institute of Technology (NAIT), Edmonton, AB — Bachelor of Applied Information Systems Technology (BAIST)—Information Systems

September 2022 – April 2024

Northern Alberta Institute of Technology (NAIT), Edmonton, AB — Digital Media and IT Diploma

September 2019 – April 2022

Business & Integration Technologies:

- Microsoft 365
- Power Automate
- ERP System Integration
- Workflow Automation
- Business Process Improvement
- Requirements Analysis
- Production Support

AI & Automation:

- AI Integration
- Workflow Automation
- Prompt Engineering
- AI-Assisted Development

Databases:

- Microsoft SQL Server
- PostgreSQL
- MySQL

Tools:

- Git
- GitHub
- Azure DevOps
- Visual Studio
- IIS
- Postman

LANGUAGES

- English (Professional Working Proficiency)
- Mandarin Chinese (Native)
